

Questions for Candidates for City Council from the Conservative Coalition of Harris County

This questionnaire will be posted onto the Conservative Coalition of Harris County website for public viewing (www.cchc-pac.org).

Candidate Name	Position that Candidate is Running For
Travis McGee	Houston City Council District D

Candidates please give your answer to each of the following questions and include your rationale with each answer. Please be concise and clear.

1. Why are you running for City Council? If elected, what will be your priorities?
Answer: I am running to give We the People of District D, a voice at City Hall. As a civic leader for over 19 years, I am doing the same things that our elected employees do. But, without the resources or platform they have. If elected, my priorities would be crime, drainage, drivable streets, infrastructure, education, and affordable housing per the demographics vs the developers.

2. What experience or skills have prepared you to serve as a city council member? What differentiates you from the other candidates and/or council members?
Answer: 19 years of experience as civic leader and advocate of actually getting things done through CIP projects, such as sidewalks, speed humps, drainage projects, streetlights, street reconstruction, and etc. The difference with me and other candidates is my level of dedication and action in improving our community long before I ever decided to run for any seat or office. I've had a vested interest as a resident and business owner.

3. What is the effectiveness of the current system for City of Houston residents to report issues/file complaints? How can this system be improved to better serve residents?
Answer: The 311 system is broken and has been broken since it's been created in August 2001. The system has to be proactive not reactive. Our elected employees have to listen to We the People and put the people before politics. Neighborhood to Standards was a very effective program which was proactive and routine without having to call about the same issues over and over again.
